

MARTKOM GLOBAL INDUSTRIES

SUSTAINABILITY POLICY

MARTKOM GLOBAL INDUSTRIES SL, hereafter MARTKOM, carries out in its headquarter of Alio an industrial activity related with furniture manufacturing for third parties, who are responsible for the final placing of the product in the market.

Among our principles and guidelines for action, we prioritize those related with the sustainability of our surroundings and the care of the environment, being aware of both direct and indirect impact that our actions can have upon it, that is why we commit ourselves to:

- Prevent the environment pollution that can be originated by our activity.
- Fulfill the applicable legal environmental requirements, as well as the ones established in the framework agreement.
- Continuously improvement in the management of the environmental aspects of our activity.

We identify as one of the most relevant environmental aspects the purchase and use of the wood as a raw material in the production of our products. MARTKOM promotes within its sphere of action an environmentally appropriate, socially beneficial and economically viable management of the forests.

Therefore, we commit ourselves to only purchase and use wood coming from forests which are managed in a responsible and sustainable way, that is why we guarantee the purchase of certified wood under the FSC standards.

MARTKOM declares that it is not either direct or indirectly involved in the following activities: illegal logging or illegal trade of wood or forestry products; violation of human or traditional rights in forestry operations; destruction of high values in forestry operations; the mass conversion of forests to plantations or non-forest uses; the insertion of genetically modified organisms in forestry operations; the violation of any of the main ILO conventions, as defined in the Declaration on Fundamental Principles and Rights at Work, 1998.

The Management
